Summary

Data Analyst with hands-on experience in Python, SQL, Power BI, and Machine Learning, gained through the Digital Pioneers Initiative (Digilians). Delivered 10+ **data analytics and visualization** projects, including interactive **Power BI dashboards** and a bilingual **RAG-based AI chatbot**. PL-300 certified with a strong foundation in **data cleaning, EDA, and statistical analysis**.

Technical Skills

Programming — Python (Pandas, NumPy, Matplotlib), SQL

BI & Visualization — Power BI (PL-300 certified), Tableau, Excel (PivotTables, Slicers), KPI Dashboards

Machine Learning — Scikit-learn, Decision Trees, Model Evaluation

AI / LLM — LangChain, ChromaDB, RAG Systems, Prompt Engineering

Automation — n8n Workflow Automation

Data Techniques — Data Cleaning, Data Wrangling, Statistical Analysis, ETL, Data Mining

Tools — SPSS, Orange, GitHub, VS Code, Streamlit, Google Colab

Projects

Egyptian Museum AI Guide — RAG Chatbot

- Architected a bilingual (Arabic/English) Retrieval-Augmented Generation assistant that answers questions about Egyptian museum artifacts using semantic search grounded in verified Wikidata sources.
- Implemented the data collection and embedding pipeline and constructed a vector database using ChromaDB.
- Designed the semantic search and prompt engineering layer; deployed the interface with Streamlit.
- Tech stack: Python, LangChain, ChromaDB, Groq API, Streamlit, Wikidata SPARQL.

Data Professionals Survey Dashboard

Analyzed a 630-respondent survey and Formulated an interactive Power BI dashboard covering salaries, job satisfaction, programming languages, and career entry difficulty.

Movie Industry EDA (Python)

Performed exploratory data analysis on 5,421+ films (1980–2020) using Pandas and Seaborn to uncover key drivers of box-office profitability.

Sales & Library Management Dashboards

- Built interactive dashboards in Power BI, Tableau, and Excel (PivotTables, PivotCharts, Slicers, Maps) to track KPIs across products, sectors, and regions.
- Designed an end-to-end analytics solution including SQL database design, data cleaning, EDA, and Orange workflows for a library management case.

Experience

Digital Pioneers Initiative - Digilians, Data & AI Trainee

12/2025 – Present

- Applied Python, SQL, Power BI, and Machine Learning to real-world datasets.
- Engineered Power BI dashboards to track KPIs and communicate insights to stakeholders.
- Applied data cleaning, preprocessing, and statistical analysis techniques.

Exeed, Customer Service Representative

01/2024 – 06/2025

- Delivered customer support and strengthened client relationship management and resolving customer issues efficiently.

Resala Charity Organization, Volunteer

01/2020 – 12/2022

Participated in community initiatives and worked collaboratively in volunteer teams.

Education

Faculty of Archaeology, South Valley University, Bachelor of Egyptology

09/2018 – 07/2022

- Developed strong analytical thinking, research, and critical thinking and evidence-based reasoning through interpreting historical evidence — skills now applied to data analysis and AI.

Certifications

Microsoft Certified: Data Analyst Associate (PL-300) — 2026

IBM Machine Learning & Deep Learning — 2026

Google Data Analytics Professional Certificate — 2026

Languages

Arabic — Native/Bilingual | **English** — Good | **German** — Basic
